**DESCRIPTIVE
PRICE LIST**

EARL E. PLATELL
AURORA, OHIO

1950 COMMENTS

The growing season for 1949 was again a very good one. We were able to plant about April 20th and picked our first blooms late in June and were still picking flowers early in October. We had several dry spells, but the use of our irrigation system helped make up the deficiency. Several extremely hot spells—90° and over for a week or more at a stretch, showed us which ones could take it. It was not unusual to see some spikes bent way over after the day's sun and heat and yet to find them perfectly straight the next morning. Some varieties had the bud sheaths burn badly but they still opened up perfect blooms.

As in our previous catalogues, we offer those varieties we consider the best. This does not mean, necessarily that you might like them, for each of us has an opinion of value that differs. To warrant a listing, we have had good growth, good propagation, good health and a general all around good performance. Anything listed that did not do this, will be noted in our description of the variety. We try to list faults as well as virtues. Descriptions on the standard varieties, such as Corona, Picardy, etc., are necessarily brief, as they are too well known to warrant full description.

It is our aim to raise quality stock, and not quantity. Fields and bulbs are state inspected. The field is rouged regularly, and any doubtful plant is dug and burned at once, regardless of its price, the \$5.00 one goes out just as fast as the three for a quarter one, if it looks doubtful. Bulbs are carefully dug and carefully handled in storage. Spraying and dusting in the field is done regularly. Bulbs are treated with 5% DDT dust in storage, the first dusting going on shortly after the bulbs are dug and a second dusting after they are cleaned.

ABOUT PRICES

Prices quoted are as low as we can make them and still furnish high quality stock. The cost of labor and supplies has not dropped during the year and in general, costs were on about the same basis as in 1948. We will prepay transportation on retail orders over \$2.50, and all orders will go parcel post unless you direct otherwise. Express is the safest and if you wish us to ship express collect, we will include extra bulbs to cover the difference between parcel post and express charges.

NOTE: Unless otherwise marked, prices on bulbs are for one bulb. To get the price on ten bulbs, multiply the one price by eight. To get the price on one hundred bulbs, multiply the one price by 64.

Example—Price of one 50 cents

Price of Ten (50c x 8) \$4.00

Price of One Hundred (50c x 64) \$32.00

If you should fail to figure correctly, quantity will be adjusted to the amount remitted.

Where a quantity is indicated for a price, such as 3/25c or 3/10c, please do not order less than the quantity shown. It costs us too much to handle smaller quantities.

Where prices listed are for more than one, such as 3/25c or 3/10c the following will be the ten price:

2/15c — 10/60c	3/10c — 10/25c	3/35c — 10/90c	5/20c — 10/30c
2/20c — 10/80c	3/15c — 10/40c	4/20c — 10/40c	5/25c — 10/40c
2/25c — 10/\$1.00	3/20c — 10/50c	4/25c — 10/50c	5/30c — 10/50c
2/30c — 10/\$1.20	3/25c — 10/65c	4/30c — 10/60c	5/35c — 10/55c
2/35c — 10/\$1.40	3/30c — 10/80c	4/35c — 10/70c	6/25c — 10/30c

EXPLANATION OF THE LISTINGS

Each variety is listed as shown below:

FAIR ANGEL (Hatch 42)

85 Days

400

Fair Angel is the variety name.

Hatch is the name of the originator.

42 stands for 1942, the year of introduction.

85 Days would be the average time from planting to blooming of a large bulb.

This may vary some depending on weather and other growing conditions.

Smaller size bulbs will probably average a few more days to blooming time.

400 is the color classification and size.

SIZES

Wherever used "L" indicates large bulbs—one measuring more than 1¼" in diameter. "M" indicates a medium size bulb, ¾" to 1¼" in diameter. This size will produce saleable spikes and frequently will produce show quality spikes. "S" is for small bulbs, measuring ¼" to ¾" in diameter. These will, in the majority of cases, produce spikes but the spikes will not have the quality that the larger bulbs make. By buying small bulbs you get a start in a variety without too big an investment, and you can usually see the color of the bloom, so that if you like the color, you can plan to buy more. If you do not like it, your outlay hasn't been too large. Of course, you will not get top performance as to spike growth, but you should end up with a large bulb for the next year.

"B"—bulblets or cormlets. This is the cheapest way of getting a start in a variety, but also the slowest. With good growing conditions, and with some varieties you may get large bulbs, but it would be safer to calculate on getting small bulbs from bulblets, which means that on about 90% of your bulblet purchase, it will take you two years to get a top size bulb. Remember also, bulblets are sometimes hard to germinate and you may only get a very few bulbs from a lot of bulblets. If possible, peel or crack the hard shell enclosing the bulblet, at least on the more expensive ones. We try to space our bulblets about 2" apart when planting, getting them in as early as possible and giving them plenty of water.

EARLY ORDERS

Early orders are appreciated and you get the choicer bulbs. These early orders enable us to get a lot of them filled before the spring rush. We suggest early ordering.

EXTRAS

We always try to include extra bulbs with each order, and try to include the newer introductions where possible. You get a chance to look at the newer varieties when we do. We would appreciate your suggestions as to what varieties you would like for extras. Please suggest several varieties for us to choose from, or if you wish we will add extras of the varieties you have ordered.

The amount of extras included with your order will vary with its size and earliness.

PLANTING INSTRUCTIONS

These will be included with all shipments. They have been carefully prepared by the North American Gladiolus Council and contain the latest up-to-date data available.

GARDEN MIXTURE

Many of our customers do not care for named varieties, they just want a balanced mixture that will give them plenty of flowers all season long, yet they want a full line of colors too. Our Garden Mixture is not made up of discarded varieties, but is made up when your order is received from named varieties and from those where name tags are lost. You will like it, we know. If you want more of the lighter or darker colors let us know and we will fill it that way.

	Per 12	Per 25	Per 50	Per 100
Large Bulbs	\$.75	\$1.35	\$2.50	\$4.50
Medium Bulbs	\$.60	\$1.00	\$1.75	\$3.00

None of the bulbs will be labeled.

SHIPPING

March 1st is about the earliest we start shipping and that is dependent on weather conditions. Shipments to the southern states usually go first.

GUARANTEE

We guarantee our bulbs to be true to name and free from disease or thrip. Please open the package immediately upon receipt, examine carefully, and if not satisfactory, advise us at once. All of us make errors once in a while and if any of the bulbs are found to be not as represented, we will either refund your money on their return, or we will replace the unsatisfactory stock. However, we can at no time be liable for more than the original amount paid for the bulbs. Due to conditions beyond our control, we are not responsible for the growth of bulbs or bulblets. All orders are placed with this understanding. Both the fields and the bulbs have been state inspected, giving us added assurance that we are shipping disease and thrip free bulbs.

GOLDEN FLUTE

Joseph M. Hartman

GOLDEN FLUTE — Joseph M. Hartman

GOLDEN FLUTE has an impressive record of winnings under a seedling number of C. F. 1. Having seen it grown, and quite frequently being present to see it win over stiff competition at the shows, we feel that Joe, as we all know him, has something he can feel proud about, and we can and do feel privileged to help introduce it.

A Giant exhibition light yellow, in a class by itself.

Florets are 7" ruffled, waved and fluted, with a sulphurino rose stripe on a medium deep yellow single lip petal. Texture of the florets is heavy.

Grows to a height of 60" in the field, with a 28" flowerhead. Sixteen to eighteen buds, seven to eight open fur in color.

Bulbulet production and germination fair.

Foliage is tall and heavy, very healthy.

Seedling of Shirley Temple and Grand Opera.

Attachment is excellent, particularly for such a large floret.

Classification 511.

Show Record:

1945

Grand Champion and largest floret (7½") at Chagrin Falls, Ohio. The same spike with the lower two florets removed took a first and Section Champion at Cleveland, Ohio two days later.

1947

Grand Champion at Toledo, Ohio.

1948

"A" rating at Binghamton International Show.

Seedling Champion at Wellsville, Ohio; Toledo, Ohio; Chagrin Falls, Ohio; Greenville, Pa.

Award of Merit, Detroit, Mich.

Grand Champion at Evans Seedling Show, Solon, Ohio.

Top scoring three spike entry at Evans Seedling Show.

1949

Seedling Champion, Largest Floret and Reserve Champion at Wabash, Ind.

American Home Achievement Winner at Wabash, Indiana with a score of 86.

Seedling Champion at Grove City, Pa.

A long list of firsts, too numerous to mention.

PRICE \$5.00 any size bulb. Price will be the same for 1951. Bulblets sold only in conjunction with bulbs, 5 bulblets and one bulb, any size for \$10.00.

NOTE—Joe Hartman has a number of nice seedlings and we hope to be able to offer more of them to you in the next few years. Joe seems to have a "way" with glads that most of us envy and few obtain. When you consider that some of his winnings have been made after transporting the flowers anywhere from a hundred to four hundred miles, you can see that Golden Flute can really take it.

- ABU HASSAN (K&M 47)** 80 Days 378
 A very dark indigo blue that has very little competition. Very similar to Pelegrina in color, but it beats Pelegrina in that its growing habits are far superior, stands up in the garden and does not crook as does Pelegrina. Buds are almost jet black. Two or three spikes in a bouquet seems to add color to the others.
 L 2-20c, M 3-20c, S 4-20c, B 50-50c
- ADORATION (Klein 48)** 70 Days 466
 Adoration is called lavender in the color classification but is much more on the pink orchid shade than lavender. Regardless of classification, it is a very nice glad. Florets are crisp in appearance and the creamy white throat makes it a standout. Will open 5 to 7 florets on a nice tall straight stem. Early and worthwhile.
 L 75c, M 50c, B 10-50c, 100-\$4.00
- ALADDIN (Palmer 38)** 85 Days 532
 An exceptionally strong growing bright salmon with a cream blotch. Opens 8 to 10 huge florets and when well grown, is a contender for show honors. You will get an occasional short hear but about 90% will be very good.
 L 3-20c, M 5-20c, S 10-20c, B 100-25c
- ALGONQUIN (Palmer 39)** 30 Days 536
 With its brilliant glowing scarlet color and its excellent growing habits, Algonquin makes both a wonderful exhibition variety and an unsurpassed commercial. 8 to 10 wide open, ruffled, needlepointed blooms on a tall straight spike.
 L 3-20c, M 5-20c, S 10-20c, B 100-20c
- ALICE ADAMS (Briggs 49)** 442
 A shade of deep pink, with a very marked transition to a white throat. A very pleasing combination and coupled with good growth, a straight spike and a good flowerhead, you have one that will make the grade. 6 open, 10 in color on an 18-20 bud spike.
 L 50c, B 4-25c, 10-50c
- ALL GLORY (Toon N.Z. 46)** 70 Days 423
 Intense orange, almost scarlet, with a purple blotch that makes a very striking floret. Just a little too much contrast to suit us, but it is unusual and interesting just the same. Opens 5 to 6 medium large florets on good spikes. Fades in the sun, as do most of the orange colors, so cut early and open inside.
 L 50c, B 6-25c
- A. L. STEPHEN (Winsor 42)** 85 Days 433
 A pretty shade of rosy red with an attractive red spot in the throat. Opens 6 to 8 slightly ruffled florets on a tall straight spike. Very attractive.
 L 3-25c, M 3-20c B 100-25c
- ANNAMAE (Pommert 40)** 70 Days 400
 A good cutter, a good shipper, a pure pleasing white, its earliness—70 days—and its dependability, make Annamae a very good commercial. 4½" florets on stems that stand well in the field.
 L 3-20c, M 5-20c, S 10-20c, B 100-25c

- ANNETTE (Dowling 48)** 85-90 Days 500
 A plain open petaled pure white, combining large size with tall strong growth. 6 to 7 florets of a 6" size are opened on a good spike.
 L \$1.50, B 4-25c, 10- 50c
- ARETHUSA (Fischer 37)** 80 Days 416
 A frilled buff that is in the early class, filling a gap in that color class at that time. Sets seed readily and is good for hybridizing. 5 open on a medium tall straight spike.
 L 3-20c, B 100-25c
- ATLANTIC (Bloom and Paddling 46)** 70 Days 522
 A very unusual combination of good color, many open and earliness, puts Atlantic almost in a class by itself. A bright red orange (vivid coral) that in a vase or basket is sensational. Up to 10 to 12 florets open at one time on a very well balanced spike. Its earliness and its color, should make this a very good commercial and it will be very noticeable on the show table when it is more widely distributed.
 L 50c, B 10-25c
- AUREOLE (Pruitt 49)** 80-85 Days 410
 One of the nicest yellows we have seen in a long time. Pure clear medium yellow, with yellow stamens, with no trace of any other color. Beautifully ruffled. 5 to 6 open on a fairly tall stem. Spike is well balanced, with no evidence of any stubby growth. If you like yellow, do not fail to look at Aureole. You will like it from the first time you see it.
 L 25c, B 25-25c
- AUTUMN GOLD (Fischer 43)** 100 Days 412
 A very good golden yellow for make-up work. Spike is rather on the short side, but it cuts close to the ground without injury to leaves, which helps considerably. Vigorous grower.
 L 3-25c, M 5-25c, B 100-25c
- BALLAD (Palmer 42)** 90 Days 440
 A pretty light salmon pink, shading nicely to a cream throat. Florets are not extra large, but their ruffing add much to their beauty. Opens 6 on a slender spike.
 L 3-20c, M 4-25c S 6-25c, B 100-25c
- BARCAROLE (Palmer 37)** 110 Days 424
 A very nice clear clean shade of orange. Holds 6 heavily ruffled florets open at one time on a medium tall spike. Very good cut flowers as the color is very attractive. It's main fault is lateness—110 days.
 L 3-20c, M 5-20c, B 100-20c
- BEACON (Palmer 35)** 90 Days 437
 An old standby for the florist. Clear, bright rose scarlet with a creamy yellow blotch. Can open up to 8 or 10 florets and grows a nice tall sturdy spike. An oldtimer, but one of the best.
 L 3-20c, M 5-25c, S 10-25c, B 100-20c

- BEAUTY'S BLUSH (Fisher 47)** 85-90 Days 440
A very faint blush pink undoubtedly places this one in the pink class. To our way of thinking, it is too light. Tall, wiry stems. Opens well in water, 7 or 8 5" florets open at one time nicely arranged on the stem. Good grower, propagates readily. A little more color would really make this glad outstanding.
L 20c, M 2-30c, S 2-20c, B 100-40c
- BELLA DONNA (Pfitzer)** 80 Days 377
A very early light blue with a darker blotch. An old timer grown mostly for its earliness.
L 3-20c, M 5-20c, S 10-20c, B 100-25c
- BERNECE (Gray 38)** 80 Days 390
We were very much surprised at the reception of Bernece on the wholesale market this year. Deep, golden yellow flaked with bronze, with 4 or 5 medium sized ruffled blooms open on a medium length spike. Comes early when a color like this is needed. Would also make a good fall flower as the color would go well with fall items.
L 3-20c, M 5-20c, B 100-25c
- BETTER TIMES (K&M 46)** 80 Days 376
A very clean light blue with a deep violet throat marking that will open four or five on a fairly tall wiry stem. Early, and its good color will give it a place.
L 2-30c, B 25-25c
- BETTY'S CHOICE (Harris 45)** 80 Days 362
Betty's Choice reminds one very much of Coutt's Orchid, except as to size. A ruffled rosy mauve in a 300 size that holds six open on a good spike. Excellent attachment and a good florist flower.
L 2-30c, M 2-25c, S 3-20c, B 25-25c
- BIRCH RED (Rich 45)** 90 Days 552
A deep red with a sheen that adds a sparkle seldom found in the red class. Opens 7 florets on an 18 or 20 bud spike. Tall strong grower even in the exceptionally hot summer we had this year. Placement good, spike straight.
L \$.100, M 75c, S 50c, B 4-25c 10-50c 100-\$4.00
- BLACK OPAL (Errey 36)** 92 Days 354
One of the good dark reds in the 300 class. Holds 8 to 10 open on a good spike. Demand stays up for this variety as it classes good for both show and commercial purposes.
L 3-20c, M 5-20c S 10-20c, B 100-20c
- BLACK PANTHER (Lins 43)** 80 Days 554
Our comment last year about this being one of the very best dark reds still stands. Very dark, 5 to 7 large wide open florets on a nice long flower head. It is early and looks very promising. Should be good for hybridizing.
L 35c, M-25c, S S-25c, B 10-25c, 100-\$2.00
- BLESSED DAMOSEL (Baerman 44)** 95 Days 440
If it would only stretch a little more, what a wonderful flower we would have. Glowing shell pink with a creamy throat and a waxy texture. Will open about 6 florets on a very passable spike. Color excellent.
L 3-25c, M 4-25c, S 10-25c, B 100-25c

- BLOEMFONTEIN K-M 48)** 90 Days 430
A very nice shade of salmon with a soft yellow blotch. 6 or 7 large wide open florets bloom at one time. Texture heavy. Placement good. Good spike. Splendid grower and propagator.
L 3-25c, B 50-25c
- BLUE BEAUTY (Pfiztzer 36)** 75 Days 476
A medium blue on the light side, shading darker toward the edges, holding about 6 open on a tall stem. Makes plenty of bulblets which propagate easily. An old timer but still a winner at the shows.
L 3-20c, M 5-20c, S 10-20c, B 100-20c
- BLUE ICE (Butt 45)** 85 Days 477
Claimed to be the nearest to a true blue. Has pale yellow or cream blotch and a yellow crescent. Holds 6 well placed florets open at one time on a tall spike. Bulblets germinate easily. It would pay you to get a start now.
L \$2.00, M \$1.50, S \$1.00, B 2-30c, 10-\$1.25
- BOBBY DAZZLER (Both 42)** 80 Days 524
Outside of burning badly in the sun, Bobby Dazzler is good. A brilliant clear velvety red orange with a deeper throat blotch. Great intensity of color. Ruffled with 5 or 6 open on a medium tall stem.
L 3-20c, M 4-25c, B 100-25c
- BOISE BELLE (Roberts 48)** 100 Days 343
A well defined pink halo on a creamy yellow floret gives you an attractive flower in Boise Belle. Even the yellow lip petals have a dainty edging of pink. It will open from 8 to 12 florets, medium size, on tall spikes of 20 or so buds. Beautifully ruffled. A little late growing, taking early planting to make the shows. Recommended highly.
L \$2.00, M. \$1.50, S \$1.00, B 2-45c, 10-\$1.75, 100-\$14.00
- BOLD FACE (Evans 47)** 85 Days 533
Outstanding brilliant deep salmon pink with a black red brush mark on a white throat. Ruffled, 5½" florets opening up to 8 in the field. Vigorous grower, good attachment, good propagator, good spike. Viewed from a distance, Bold Face makes a startling impression.
L \$1.00, M 75c, S 50c, B 2-25c, 10-\$1.00
- BOLERO (Leffingwell 41)** 85 Days 582
One of the most unusual glads in the catalogue. Smoky orange with a dark red blotch, ruffled, fluted, needle pointed and very heavy texture. Five or more open on a good stem. Either you like it or you do not like it, but it attracts your attention anyway.
L 3-25c, M 4-25c, S 10-25c, B 100-25c
- BOULOGNE (Salman 47)** 85 Days 562
A clear wine red that is destined to go places. A color that is hard to find, good growth, excellent habits, and good spikes from even the medium bulbs. Watch this one at the shows, try it and see for yourself.
L 2-25c, B 50-25c
- BUCKEYE BRONZE (Wilson 40)** 90 Days 490
Ruffled bronze with a rosy reddish cast that makes a very attractive color. Well liked by the florist and a hard one to beat on the show table. When well grown it will have six open on a tapering medium long spike.
L 3-20c, M 4-20c, S 10-25c, B 100-25c

- BURGUNDY (Scheer 42)** 90 Days 452
A deep rose, almost to be classed as red except that the bluish cast it has brings it into the rose class. Nice florets 6 to 8 open nice spike, good placement, worth looking at.
L 15c, S 3-15c, B 50-20c
- BURMA (Palmer 43)** 85 Days 562
A deep dark rose, somewhat lighter in the throat 7 to 10 open, heavily ruffled, always well placed florets on a tall straight spike, with nearly all the buds showing color. A brief description to one of the best we have. Good exhibition, and one of the best for commercial. It is slow in opening the florets, so allow accordingly.
L 3-25c, M 4-25c, S 6-25c, B 100-25c
- BUTTERSCOTCH (Langworthy 48)** 90 Days 531
Soft salmon buff, with a fairly prominent blotch of a harmonizing deeper rose salmon. Florets are large, somewhat ruffled, well attached and well placed. Good propagator and good germinator. Nice spike, well balanced throughout.
L 75c, M 50c, S 25c, B 10-75c, 100-\$6.00
- CARNIVAL (Butt 47)** 85 Days 437
A very pretty combination of red with a pure white throat gives us an unusually nice effect. 18 buds on a straight spike, with 8 to 10 open. Florets are well placed and well attached. Excellent propagator and good germination. Very attractive with commercial possibilities.
L 40c, M 30c, S 20c, B 10-25c, 100-\$2.00
- CASABLANCA (Majeski 44)** 95 Days 400
An excellent white holding 6 to 8 open on a tall straight spike. Florets nicely ruffled. Good commercial.
L 3-20c, M 5-20c, S 10-20c, B 100-25c
- CHAGRIN (Evans 45)** 82 Days 511
Primrose yellow with red throat markings. Florets have tapered points. Makes very large seed pods. Holds 5 to 6 open on a medium tall straight spike.
L 3-25c, S 10-25c, B 50-25c
- CHAMOUNY (Baerman 38)** 85 Days 360
One of the real good ones. A silver edging on petals of cerise rose, holding 10 open, on a long tall head, gives Chamouny the edge on the show table and makes it an excellent commercial. You will like its color, its performance and its beauty.
L 3-25c, M 5-25c, S 10-25c, B 100-25c
- CHARMAINE (New 40)** 75 Days 360
Here is an early rose, clear with a darker throat, that makes a good commercial. Will open 5 or 6 large, well placed florets on a flower head that is very good. While rated a 300 class, it could almost rate a 400. Extra early and a good commercial.
L 3-20c, M 5-20c, S 10-25c, B 100-20c

- CLINGENDAAL (Byvoet 39)** 80 Days 350
 Each year we threaten to discard Clingendaal, mostly because of the brownish feathering in the throat, which detracts rather seriously, in our opinion, from its beauty. It is about the earliest light red we grow, and its growth leaves nothing to be wanted. Tall, husky spike, five or six open, very vigorous, good propagator, healthy, in fact everything one could ask for except color. Moves good on the wholesale market.
 L 3-20c, M 5-20c, B 100-25c
- COLOGNE (Roberts 48)** 80 Days 342
 A bright and attractive pink, with a cream throat, and what is more, a fragrance reminding one of a tea rose. If for no other reason than the color, Cologne would be good, but with the added attraction of its fragrance, it is worth considering. If you are hybridizing for fragrance, you should by all means have Cologne in your garden.
 L \$1.00 B 2-20c, 10-75c
- COLOR MARVEL (Kreuger 46)** 75 Days 316
 Yellow orange, and a pink cast, give color to this glad. Very attractive and useful for floral work, blending well with blues and other yellows. Good grower, good propagator, good show flower and a coming commercial. Opens 5 on a 18 to 20 bud spike, with a tall wiry stem.
 L 2-25c, M 3-25c, S 6-25c, B 50-25c
- COMPLEXION (J. Bastion Sr. 47)** 90 Days 442
 Shell pink, nicely ruffled, opening up to 8 on a tall straight spike. Apparently a good show flower and a promising commercial.
 L \$5.00, M \$3.00, B 1-25c, 10-\$2.00
- CONNECTICUT YANKEE (Schenetsky 44)** 85-90 Days 441
 An excellent fine pink with a sharp blotch of orange scarlet, not too beautiful a color combination in our estimation. It will win on the show table because of its excellent performance. Will open 8 or more florets, beautifully placed, on a tall, husky straight spike. If you are a show fan, you should have this one. Makes up well in basket work, so it should do well commercially.
 L 50c, B 5-30c, 10-50c, 100-\$4.00
- CONNIE "G" (Woods 48)** 75 Days 506
 A heavily ruffled cream with a yellow throat. Excellent substance, will hold 8 open with probably 8 more showing color. Florets firm, and well attached, with the possible exception of the first floret that sometimes is a little out of place. Bulblet production good and germination excellent. In fact we had almost as good bloom from bulblets as from the good stock.
 L \$4.00, M \$3.00, S \$2.00, B 1-50c, 10-\$4.00, 100-\$32.00
- CORONA (Palmer 40)** 80 Days 560
 Our stock of Corona is well marked and does not have the faded edge so often seen. Cream white, shading deeper in the throat, with a rose picotee edging that shows it off nicely. Excellent show flower and good commercial. A very good keeper and a favorite of every florist.
 L 3-20c, M 5-20c, S 10-20c, B 100-20c
- COUTT'S ORCHID (Coutts 41)** 85 Days 560
 Orchid rose, light and unmarked, with a creamy throat. Rather soft and attachment leaves one disappointed at times, but on the whole attractive. Hold 6 to 8 open, on a good spike.
 M 5-20c, S 10-20c, B 100-25c

- COVER GIRL (LaSalle 45)** 90 Days 542
An attractive shade of medium pink, with 6 to 8 open on a tall straight stem. Florets are nicely ruffled, 5½", and well attached. Good show table glad, and has excellent commercial possibilities. Try this one.
L 2-25c, M 4-25c, S 10-25c, B 100-\$1.00
- CRACKER JACK (Allen 46)** 80 Days 425
A deep orange shading to yellow in the throat, with a red blotch. 6 open, 6 in color, about 16 buds seems to be field production. Blooms well from small stock and bulblets will even bloom. Excellent show flower and commercial.
L 25c, M 2-30c, S 4-30c, B 5-25c, 100-\$1.00
- CRIMSON TIDE (Roberts 45)** 90 Days 452
Crimson Tide gave us excellent results this year. A deep glowing crimson red, heavily ruffled, velvety texture, with extremely heavy substance. Has a small white mark in the throat, that sometimes extends down on the midrib. Fairly good propagator according to the originator, but our results show about 50% of the bulblets grow.
L 60c, M 40c, S 25c, B 10-35c, 100-\$2.80
- CRINKLE CREAM (Ellis 40)** 85 Days 410
A little more growth on Crinkle Cream would make it an excellent glad. Good spike, with about 4 open, 15 buds. Color excellent, giving a very large ruffled clear light yellow floret. Goes good on the commercial market.
L 3-25c, M 5-25c, S 10-25c, B 100-50c
- C. ROBERTS (Both 48)** 85 Days 452
A very unusual but attractive variety. Fiery orange tone cerise red, blending beautifully to an almost purple throat. The effect of the whole is almost that of a self color. Tall spikes, about 6 large florets open. Good propagator.
L \$2.00, B 4-50c
- DAISY MAE (Lins 45)** 90 Days 521
Tall and husky, but not too pretty is our rating on Daisy Mae. Opens 6 to 8 florets on a long flower head. Stands heat well. Color is an orange salmon with a little blotch of cherry red that is not too attractive. Its growing habits will make it a commercial, and its overall ability to make a good spike gives it show honors.
L 2-30c, M 2-20c, S 4-20c, B 25-15c, 100-65c
- DANNY DANTON (Kaylor 46)** 452
One of the good black reds. A tall strong grower. Not too well known but you will hear more of it when widely distributed. 6 open on tall straight spikes.
L 25c, M 2-25c, S 4-25c, B 10-25c
- DAWN GLOW (Jack 45)** 83 Days 560
Early ruffled medium rose on a strong stem. 5-6 florets open. Good florists color.
L 20c, M 2-20c, B 20-25c
- DAYDREAM (Roberts 47)** 70 Days 430
A very early blooming ruffled pale pink opening 7 to 9 large florets. Most of the buds show color. Less flocking would make it much more attractive. Its earliness is much in its favor. Bulblets are slow to germinate.
L 35c, M 2-35c, S 4-25c, B 20-50c

- DAZZLER (Both 1940)** 80 Days 421
Cut early when first floret is ready to open is the rule on Dazzler as its scarlet orange burns in the sun. It has a dark blotch in the throat that helps set it off. Will open 8 to 10 slightly ruffled 5½" florets on a good stem.
L 3-25c, B 25-25c
- DEBORAH SAMPSON (Scheer 47)** 85 Days 440
A pastel blend of soft pink and creamy buff. A tall, strong growth, 7 to 10 large well placed, well attached blooms, make this a good show prospect as well as a good commercial.
L 60c, M 45c S 25c, B 4-25c, 10-50c, 100-\$4.00
- DIADEM (Lines 46)** 75 Days 462
A fragrant two toned rose, blended in a very attractive way with a cream throat. Opens 6 to 8 lightly ruffled 5" florets, which are firmly attached to a good spike of 16 to 18 buds. Fragrance is most noticeable after spike has been cut for a day or two.
L \$2.00, M \$1.50, S \$1.00, B 2-25c, 10-\$1.00
- DISCOVERY (Baerman 43)** 85 Days 511
Heavily ruffled light yellow offset with a bright red star in the throat. Some times flushes pink, depending on fertilizer and weather. Will open 5 to 6 florets on a tall spike. Inclined to be top heavy, but otherwise nice.
L 3-20c, M 5-20c, S 10-25c, B 100-25c
- DOLORES (Vasturo 43)** 75 Days 240
A small informal pink with a white throat. For a small glad, it is very nice both in color and form and it is early. Rather slow propagator.
L 25c, M 2-30c, S 3-25c, B 10-25c, 100-\$2.00
- DONELLA (Wright 47)** 65 Days 340
An early pink with a white throat, in a nice combination of color. Opens 5 or 6 fairly large florets on a 16-18" bud spike. Good propagator, many of the bulblets blooming. This is an early variety and should not be figured to compete with mid season varieties.
L 2-30c, M 2-20c, S 4-25c, B 10-25c, 100-\$2.00
- DONNA (Pruitt 40)** 95 Days 416
A golden buff, beautifully ruffled, holding 6 open on a very tall straight stem. Well liked by the florists and able to hold its own on the show table.
L 3-20c, M 5-20c, S 10-25c, B 100-25c
- DR. WHITELEY (Riley 43)** 85 Days 516
This is more a commercial than an exhibition glad. Clear, yellowish apricot with a golden throat, opening 5 to 7 florets which are large and well placed on the straight spike. Color is good and so is performance.
L 3-20c, M 5-20c, S 10-25c, B 100-25c
- DUSTY MILLER (Elliott 45)** 85 Days 486
Smoky old rose with small red blotch with cream pencil lines. 6-8 florets open on a tall spike.
L 2-30c, B 25-25c
- EASTER PARADE (Briggs 49)** 70 Days 400
A very good white, immaculate without any color markings. Not a dead white, has enough sparkle to be very attractive. Placement and attachment are very good. Spike length and balance are good. Early. If you want a good white it will pay you to look at Easter Parade.
L 35c, S 2-20c, B 10-50c, 100-\$4.00

- ELIZABETH THE QUEEN (White 41)** 85 Days 566
 A fine exhibition flower in a light mauve lavender with large beautifully ruffled florets. Mostly medium height but has a good flowerhead. Keeps well, which makes it a good florists flower and it is really hard to beat on the show table. One of our best lavenders, and a "must have" for every garden.
 L 3-20c, M 5-25c, S 10-25c, B 100-20c
- ESSA MARIE (Coutts 46)** 85 Days 542
 A very attractive light pink, smooth and soft. Will open 6 nicely rounded florets on a spike, that if it would stretch just a little bit more would be very good. Florists like it very much.
 L 3-25c, M 4-25c, S 10-25c B 100-25c
- EUREKA (Fairweather 48)** 90 Days 500
 Somewhat like old Maid of Orleans in color, white with a creamy throat. Could also be called a White Leading Lady. Grows tall, about five feet, and has an excellent flowerhead. Opens about like Picardy, of which it is a sport. Florets will run up to 5½" but sometimes carry the Picary reversion signs.
 L 50c, M 35c, S 25c, B 3-25c, 10-50c, 100-\$4.00
- EVANGELINE (Palmer 48)** 92 Days 560
 A beautiful pink somewhat between the light and pale shades. Consistent show winner as when well grown it will hold from 10 to 12 florets open on a tall straight spike. If you exhibit at shows, you most certainly want Evangeline.
 L \$2.50, M \$1.50, S \$1.00, B 1-20c, 10-\$1.50
- EXEMPLAR (Kreuger 44)** 100 Days 332
 An excellent small salmon, but it has to be planted early. Opens 8 to 9 florets on a good straight spike, and being in the 300 class, it fits well into arrangements. Good commercial and good exhibition.
 L 3-25c, M 4-25c, S 10-25c, B 100-25c
- FAIR ANGEL (Hatch 42)** 85 Days 400
 Deep Cream throat shading lighter toward the petal edges to a beautiful creamy white. Will open 6 round somewhat wavy florets on a tall straight spike. Opens well in water.
 L 3-20c, M 5-20c, S 10-25c, B 100-25c
- FAIRY (Kuhn 46)** 75 Days 266
 A very nice light lavender blue, a plain color without any noticeable throat markings. Color is a little on the quiet side, but attractive. 4 or 5 open on a tall wiry stem. Propogates well.
 L 50c, M 35c, S 25c, B 10-50c
- FAY (Jack 45)** 75 Days 440
 A very early salmon pink with a cream throat, pink somewhat blotched. Opens well in water, makes a good spike with 6 or 7 open. Its real advantage is its earliness, and for floral work it is good. Propogates well.
 L 3-25c, B 100-25c
- FILIGREE (Kuhn 45)** 80 Days 216
 A beautiful buff colored miniature, wide open, lacinated and ruffled, opening 5 or 6 3" florets on a wiry stem. Very distinctive.
 L 50c, M 30c, S 25c, B 10-50c

- FIREBIRD (Kuhn 47)** 75 Days 436
 We liked Firebird very much and it looks like a glad with commercial prospects. A fine, nice clean scarlet red, opening about 6 florets on a tall 20 bud spike. We had some crooking. Early. Worth trying in your garden.
 L 50c, M 35c, B 10-50c, 100-\$4.00
- FIREBRAND (Butt 44)** 85 Days 452
 A glistening shade of medium red with a fine white stripe on the lower petals, buds in the shape of beautiful rose buds. Tall, many open, straight spikes, its health, and its ability to propogate well, give Firebrand an o.k. in any garden. Tops as a commercial and exhibition.
 L 3-25c, M 5-25c, S 10-25c, B 100-25c
- FIRERIDER (Feuerreiter) (K & M 47)** 105 Days 550
 Rich vermillion red, with lots of florets open at one time. Texture is heavy, placement and spacing good, spike long and tapering. Good propogator. Good exhibition and good commercial. Its only fault is its lateness.
 L 20c, M 2-20c, S 5-25c, B 25-25c
- FLICKER (Kuhn 46)** 75 Days 221
 Orange, in the medium class, with a yellow throat on which there is a bright scarlet blotch. Very attractive. Will open 5 or 6 on a 16 bud spike, which is always straight. Early. A good one.
 L 35c, M 25c, S 2-25c, B 10-25c, 100-\$2.00
- FLORENCE NIGHTINGALE (Harris 47)** 88 Days 400
 Crisp ruffled white florets, precisely arranged on a tall tapering spike gives us a glad to delight anyone. Attachment good, texture good, propogates well. Recommended highly.
 L 75c, M 50c, S 30c, B 10-25c, 100-\$2.00
- FLYING FORTRESS (Wilson 43)** 93 Days 586
 A huge smoky lavender gray with a very bright red feather. Opens 8 or 10 at a time and makes a very spectacular spike. A show flower, but if you like big ones, you should try it. Excellent show record, and has many awards for most open and longest flower head. Propogates easily.
 L 20c, M 2-20c, S 10-25c, B 50-25c
- GENGHIS KAHN (Scheer 41)** 80 Days 432
 A medium shade of pink, heavily ruffled with a long flowerhead and a good spike. Holds 8 open out of about 16-18 buds. Has very good commercial prospects. Propogates well. Very good.
 L 25c, M 2-25c, S 4-25c, B 15-25c
- GLAMIS (Palmer 40)** 90 Days 530
 Light salmon rose with stylish pointed florets, cream lip. Opens 6 large ruffled florets on a medium tall spike. Blooms from small bulbs. A splendid cut flower and well liked for floral work.
 L 3-20c, M 4-25c, S 10-25c, B 100-25c
- GLEAM (Fischer 46)** 77 Days 410
 A gleaming waxy texture light yellow with unusually thick petals. Does not open more than 4 or 5 florets, but it makes up nicely in floral work. Propogates well.
 L25c, M 2-30c, S 4-25c B 25-25c

- GOLDEN ARROW (Pruitt 47)** 85 Days 510
A true light yellow that will open 6 to 8 florets on a tall straight spike. Healthy and vigorous, germinates and propagates well. Good commercial as it opens well when cut tight. A good show flower.
L 25c, M 2-30c, S 4-25c, B 10-25c, 100-\$2.00
- GOLDEN BEAUTY (Coates 47)** 85 Days 512
A medium to dark yellow with 8 open on an 18 bud spike. Good spike, excellent attachment. For you yellow fans, here is one to look at—you will like it.
L 50c, M 35c, S 25c, B 10-25c
- GOLDEN OPHELIA (Jensen 49)** 512
Deep yellow self color with long pointed buds opening into large florets of excellent texture. 6 open on a good stem and lots of color in remaining buds.
L \$1.00, M 75c, S 50c, B 12-\$1.00
- GOLDEN STATE (Wheeler 42)** 90 Days 512
A real beauty in a late blooming yellow. Opens 6 to 8 perfectly placed florets at one time. One of the best selling varieties for the late cut flower market.
L 15c, M 2-20c, B 50-20c
- GRACE ESTELLA (Youmans 45)** 85 Days 430
A really beautiful fully ruffled pink and cream, so nicely blended as to be almost perfect. Opens about 6 florets on a medium tall stem. It is becoming more popular every year. Not a champion for size or length of spike, but one you will like very much.
L 2-30c, M 3-25c, S 10-25c, B 100-25c
- GRATITUDE (Fischer 46)** 75 Days 424
Salmon orange, with a sharp yellow throat, nicely ruffled. Opens 5 to 7 on a tall stem, but placement is not always perfect. Does not crook and seems to stand hot weather well. As a commercial, it should have serious consideration.
L 2-30c, M 2-25c, S 4-25c, B 10-25c, 100-\$2.00
- GRAY DAWN (Both 43)** 95 Days 486
A rather interesting light gray sport of Jalna with attractive large spikes with excellent placement. Very attractive. Bulblets are plentiful and germinate well. If you are smoky fan, be sure to look at Gray Dawn.
L 2-20c, M 3-20c, S 5-25c, B 100-50c
- GREAT LAKES (Kahn 46)** 70 Days 476
One of the nicest blues we have. Light soldier blue, clear and unflecked, shading lighter toward the throat. Makes plenty of large bulblets which germinate well and often bloom. Makes a spike about 5 feet tall with 4 to 6 open.
L 50c, M 35c, S 25c, B 10-25c
- GRENADIER (Palmer 44)** 85 Days 416
A light orange buff that is different and good. An imposing spike. 6 to 8 large blooms on an 18 to 20 bud spike. Strong grower, healthy, about 5 feet tall. Good show flower and commercial.
L 3-25c, M 4-25c, B 100-25c

- GRETA GARBO (Pfisterer 37)** 85 Days 440
 A consistent performer in a soft, very light rose with a cream lip. Opens 6 to 8 florets on a tall strong stem. Exceptional for cut flower purposes and a good show glad. Excellent for hybridizing.
 L 3-20c, M 4-20c, S 10-25c, B 100-25c
- HARMAU (Both 40)** 75 Days 533
 A large orange red with a rosy overtone spreading outward from the throat. Slightly ruffled florets, 6 to 8 open, on a 20 bud spike. Propogates well. Very early.
 L 3-20c, M 5-20c, B 100-25c
- HAROLD K (Knight 49)** 85 Days 536
 Listed as a scarlet but actually a deep scarlet red. Produces florets of fine color and heavy substance. Spike is good and also attachment. Makes lots of bulblets. One of the newer ones that is worthy of attention.
 L \$2.50, M \$1.50, S \$1.00, B 2-40c, 10-\$1.60
- HAWKEYE RED (Heaton 44)** 85 Days 450
 A red sport of Vagabond Prince, growing a little larger than Vagabond Prince. Strong grower, propogates well. Color is good and it will make a good commercial.
 L 3-25c, M 4-25c, S 10-25c, B 100-25c
- H. B. PITT (Both 41)** 80 Days 430
 A light salmon or even a light orange pink, with a cream throat, a smooth color. Tall stiff stems with up to 6 open. Blends well with other colors.
 L 3-30c, M 4-25c, S 6-25c, B 50-25c
- HEARTS DESIRE (Fiedler 48)** 80 Days 540
 Hearts Desire again performed in a way to give it an excellent rating. A really beautiful medium to light creamy pink with heavily ruffled florets. 6 to 8 open on tall spikes with excellent flowerheads. Be one of the first to have it. You will win lots of ribbons if you do.
 L \$1.25, M 75c, B 3-25c, 10-75c
- HENRY DE GREIVE (K & M 49)** 95 Days 423
 A salmon orange with a marked Ochre blotch, overlaid with carmine feathering. Very noticeable because of the color contrast. Opens 8 on a 20 bud spike and has a good flowerhead. Texture is heavy, attachment excellent. Strong healthy grower and a good propagator.
 L \$2.00, M \$1.25, S 75c, B 2-30c, 10-\$1.20
- HIHAT (Lins 45)** 100 Days 430
 Not very well known. An orange pink holding 6 open on a good stem, with most of the buds showing color. A little late in blooming is its main fault.
 L 20c, M 2-30c, S 4-25c, B 10-25c
- H. R. HANCOCK (Both 43)** 80 Days 463
 A clear deep cherry rose with a clear creamy white throat. Perfect double row placement with up to 8 open. Opens well when cut tight which with its color, makes it a good commercial.
 L 3-20c, M 6-25c, S 10-25c, B 100-25c

- HUNTRESS (Jack 45)** 75 Days 466
 Very similar to Minuet, but two weeks earlier, and much easier to propagate. A little on the pink side of lavender, and color is not as good as Minuet, but its earliness puts it into the lavender picture particularly from a commercial viewpoint.
 L 2-30c, M 2-25c, S 4-25c, B 10-20c, 100-\$1.00
- HURRICANE (Evans 42)** 80 Days 424
 A bittersweet orange with a light cream throat. A red feather gives an added touch of color. Holds 5 to 6 open on good stems. Moves well on the wholesale market. Early, good propagator.
 L 3-20c, M 4-25c, S 10-25c, B 100-25c
- INTRUDER (Graft 44)** 90 Days 536
 A large, very beautiful light scarlet red, with just a little white to lighten the shade. 8 or 9 large florets open on an 18 to 20 bud spike. Good grower, propagates well, good commercial.
 L 25c, M 2-40c, S 2-30c, B 10-25c, 100-\$2.00
- IRAK (Mitsch 37)** 90 Days 586
 A nice clear gray that blends well with yellow. 5 or 6 large florets open on a good spike. Not shown very often, but well liked by the arrangers.
 L 3-20c, M 4-25c, B 50-20c
- IVY ROBERTSON (Barrett 43)** 80 Days 440
 For a long floral head, many open, try Ivy Robertson. Classified as light pink but in our opinion it is in the wrong class. A yellow and cream throat, more pronounced than the pink, certainly take it out of the pink class. Regardless of classification you will like its color, its growing habits and its all around performance. Leaves have a light yellowish cast. Rates "Tops."
 L 2-25c, M 4-25c, S 6-25c, B 100-25c
- JALNA (Palmer '36)** 85 Days 480
 A bouquet of Jalna give one the color impression of rose, but actually you have a mixture of salmon and rose, making up in a smokie. An odd but pleasing color. Opens up to 10 well placed blooms on a medium spike.
 L 3-20c, M 4-25c, B 100-25c
- JAY'S JOY (Youman 43)** 90 Days 422
 A medium orange with a white center that grows straight, strong tall spikes with 6 or 7 florets open. A good florists color and well liked by them.
 L 15c, M 2-20c, S 6-25c, B 100-25c
- JEANETTE WHITE (Both 48)** 85 Days 431
 Flicked very badly this year, which will probably take it out of our list after another years trial. A medium light salmon pink with a cyclamen blotch not very prominent on a cream throat. Tall and straight and slightly ruffled. General overall picture good, many open, good spike etc., except for flecking.
 L \$1.25, M \$1.00, S 75c, B 1-25c 10-\$2.00
- JOLLY ROGER (Hatch 49)** 562
 A ruffled, needle pointed dark rose with a scarlet shading and a darker blotch. Upper part of throat is much lighter than bottom. Very tall, strong, husky plant with 6 open florets. Our only criticism, if any, would be the throat marking which detracts considerably from its beauty.
 L \$2.00, B 25c, 10-\$2.00

JOHAN VON KONYNENBURG (K&M 47) 85 Days 436

One of the best of the recent European introductions. A rich glowing vermillion red opening up to 8 florets at one time. Attractive color and should go good anywhere. Spike well proportioned.

L 3-20c, M 5-20c, S 10-20c, B 100-25c

JONQUIL (Palmer 34) 80 Days 312

A very clear deep yellow, very much on the dark side. Tall slender straight spike holding 4 to 6 open. Does not open too well when cut tight.

L 3-20c, M 4-25c, B 100-25c

JUNE DAY (Rober's 46) 60 Days 441

June Day is an early pink with twin blotches of cherry red. Earliness is its chief attraction as it leaves much to be desired from a color standpoint. Propogates well from a prolific supply of large bulblets, which produce good size bulbs. Inclined to split from old bulbs. If you grow for the early market, you should try June Day.

L 75c, M 50c, S 25c, B 1-50c, 10-\$4.00, 100-\$25.00

JUNIOR MISS (Canine 44) 90 Days 430

A deep salmon pink with lighter midribs lightened by a cream blotch on the lower middle petal. Opens about 6 on straight stems, out of about 18 buds. Good commercial and show glad.

L 3-25c, M 5-25c, S 10-25c, B 100-25c

KAWATRI (Pupich 47) 85 Days 516

A creamy buff with a yellow throat. Edges of petals are slightly tinted pink. Unopened buds are golden buff with a pink tint. Florets are large, nicely frilled and of heavy texture, with 6 to 8 open. Spikes are tall but may crook or twist with extremely hot weather. Would like it much better if it were a shade or so darker.

L 75c, M 50c, S 35c, B 3-25c, 10-75c

KENWOOD (Lins 43) 80 Days 452

Christmas red, no marks blotches or stripes, 5 florets open on a tall wiry spike, all make a striking appealing spike. Good propogator, and good cut flower. Not a show glad but well liked on the wholesale market.

L 3-20c, M 4-25c, S 10-25c, B 100-25c

KING ALFRED (Hobbs 45) 80 Days 532

If you want a glad that will make tall spikes, 6 open out of 20 buds, distinctive, try this large orange salmon with a cream blotch. A good show glad. Seems to grow good spikes without any particular care, with the possible exception of staking.

L 25c, M 20c, S 2-25c, B 20-25c

KING BEE (Krueger 41) 90 Days 436

Had a lot of excellent spikes this year. Opens up to 8 or 9 but with that many open, the spike has too much flower and not enough buds. A scarlet with a dark edging, with medium tall straight spikes, husky grower. Moves well on commercial market.

L 3-20c, M 4-20c, S 10-25c, B 100-25c

KING CLICK (Wilson 41) 90 Days 552

What a lot of beautiful spikes you can pick from a row of King Click, all straight and sturdy. Add a beautiful scarlet color, perfect placement and you have a spike hard to beat anywhere. 6 to 8 open, 18 to 20 buds, healthy, easily grown to show quality. Good commercial.

L 2-20c, M 5-25c, S 10-25c, B 100-25c

- KING LEAR (Palmer 38)** 75 Days 570
 - Another one of the "Kings" and a good one. Clear deep reddish purple with a silver line on the edges of all petals. Opens 5 to 6 on tall strong willowy spikes. Very valuable for hybridizing.
 L 3-20c, M 5-20c, S 10-25c, B 100-25c
- LADDIE (H. Wilson 40)** 88 Days 440
 A glad that will open 8 to 10 large florets on a tall straight spike, with plenty of buds. is always interesting. Light pink, lightly ruffled. Should be staked in the field as it has a heavy top. A good color and useable anywhere.
 L 3-20c, M 5-25c, B 100-25c
- LADRONE (Palmer 47)** 90 Days 433
 A floret on the Beacon style, but larger, showier, and a stronger more robust plant. Light rose shading to scarlet at the tips, with a light yellow blotch. Lightly ruffled. 18 to 20 buds, 6 to 8 open—6 to 8 in color. Tapering spike. Good propagator, making large bulbs from bulblets.
 L 35c, M 25c, S 15c, B 15-25c
- LADY JANE (Lake 41)** 85 Days 406
 A cream with yellow lip petals, slightly ruffled, and can be used either as cream or yellow. Opens 6 to 8 well placed florets on a good husky stem. Excellent show flower when well grown and very good for florist trade.
 L 3-20c, M 5-25c, B 100-25c
- LADY MARION (White 48)** 85 Days 466
 A pink lavender with beautifully ruffled florets on a tall straight spike. Holds 6 to 8 open on a 20-24 bud spike, florets nicely faced and spaced. Nice grower and a good prospect for show and commercial. Color could be better, especially the throat marking, but spike formation and the number open offset the color handicap.
 L \$1.25, M \$1.00, S 50c, B 3-25c, 10-\$1.00
- LANCASTER (Palmer 44)** 85 Days 470
 One of the best purples. Has a silky texture and considerable depth of color. Opens 6 to 8 on a tall straight stem. Bulblets are small but they grow well. If you like purple, you should by all means look at Lancaster.
 L 2-30c, M 2-25c, S 4-25c, B 10-20c, 100-\$1.50
- LANTANA (Palmer 43)** 75 Days 420
 We have about given up trying to get stretch in the Lantana and are resigned to growing it in clumps amid annuals and shrubs. Orange shading to salmon with a golden throat, beautiful, just the thing for a splash of color in August.
 L 3-25c, M 5-25c, B 100-25c
- LAVENDER AND GOLD (Baerman 43)** 70 Days 366
 A pastel lavender with a yellow throat with 5 to 6 open on a tall willowy stem. Florets are well faced, with plenty of space between them. A beautiful flower and very well liked by the florist. A good commercial. Propagates well.
 L 3-25c, M 5-25c, S 10-25c, B 25-25c, 100-65c
- LAVENDER DREAM (Grade 48)** 85 Days 466
 A bright attractive lavender, more of a rose violet, with attractive creamy marks. Makes tall spikes with about 6 open. Should be a good commercial and a good show glad. Very clean and exceedingly interesting.
 L 2-30c, M 3-25c, B 25-25c

- LAVENDER PRINCE** (LaSalle 44) 93 Days 466
A good addition to the lavender class. Tall, husky, and a good commercial. Snowy white, waxy florets perfectly placed on tall spikes of 18 to 20 buds. Mauve lavender with darker lines.
L 2-20c, M 3-25c, S 5-25c, B 15-25c
- LEADING LADY** (Johnson 42) 87 Days 506
Light cream in color, but the florists take it for white without any trouble. Consistent performer, unexcelled for commercial and show tables alike. 6 to 8 large florets open on a very good stem, tall and strong. One of the best glads of today and certainly should be in every garden.
L 3-20c, M 4-20c, S 10-25c, B 100 25c
- LEGEND** (1940) 90 Days 540
A light pink which if it would only open more, would really be nice. 5 or 6 open is the best we can do, otherwise it is good. Fair propagator.
L 3-20c, M 5-25c, B 100-20c
- MADONNA** (Bork 42) 84 Days 500
Snowy white waxy florets perfectly placed on tall spikes of 18 to 20 buds. Excellent germinator and propagator with good growing traits. A winner of numerous awards.
L 15c, M 2-15c, S 3-15c, B 50-50c
- MAID OF ORLEANS** (Pfitzer 32) 80 Days 400
One of the leading commercial whites. Milky white with a cream throat, tall and straight with 6 to 8 open. Healthy.
L 3-20c, M 5-20c, S 10-20c, B 100-25c
- MARGARET BEATON** (Twomey 37) 85 Days 501
Snow white with a scarlet blotch in the throat gives us a glad that is still in the running with prospects of staying there for a long time. A clean color and a better combination of colors than some of the newer ones so highly touted. 6 to 8 open tall strong stem, good propagator. Excellent show flower and still a major prize winner at the shows.
L 3-20c, M 5-20c, S 10-20c, B 100-25c
- MARGARET WOOD** (Marshall 47) 80 Days 570
A huge rose-purple wine color shading to light in the throat. Tall straight stem with 6 to 8 open. Good florists color. Propagates well.
L 2-30c, M 2-25c, S 4-25c, B 25-25c
- MARION PEARL** (Benedict 42) 85 Days 532
Light salmon shading lighter in the throat gives an attractive picture. Opens up to 8 large florets on a fairly tall spike, which does not crook. Mostly a show variety.
L 2-30c, M 2-25c, S 4-25c, B 25-25c
- MARLENE BOTH** (Both 43) 76 Days 430
A delicate orange to salmon pink with a cream throat, a very beautiful ensemble. Just enough ruffling to make an attractive flower. About 6 open on a good spike. One of our favorites.
L 20c, M 2-30c, S 4-25c B 25-25c
- MARY KATHLEEN** (Kinyon 44) 70 Days 400
A white in the 400 class—almost a dead white. Opens 6 to 8 slightly ruffled florets on a straight spike that never crooks. Good flowerhead.
L 3-25c, M 4-20c, S 10-25c, B 100-25c

- MAURRIE TREVAN** (Both 46) 80 Days 454
 Velvety black-red. Easily holds 8 florets open on a tall spike. A fine exhibition variety. One of the dark reds that appeals to everyone.
 L \$1.00, M 60c, S 40c, B 12-50c
- MAUVIE ROSE** (Wesselman 48) 70 Days 462
 With outer petals of deep rose blending into Mauve in the throat, you have a spike that is very attractive. Opens 5 to 6 florets on a well balanced spike. A consistent performer, early and medium good propagator.
 L \$1.00, M 75c, S 50c, B 2-25c, 10-\$1.00
- MERRY MAID** (Roberts 49) 70 Days 440
 A very early flowered pink and white, ruffled and of good substance. Should go good on the early cut flower trade. Propagates well.
 L \$1.50, M \$1.25, S \$1.00, B 10-\$1.25
- MIGHTY MONARCH** (Butt 46) 85 Days 552
 Deep red with a velvety texture. An extra strong grower which holds 8 to 10 open florets. Lots of buds many showing color. Propagates well and a desirable add to have. Spike is exceptionally tall and perfectly straight.
 L 35c, M 25c, S 15c, B 15-25c, 100-70c
- MINUET** (Coleman 22) 90 Days 466
 The oldest gladiolus we list and still very desirable. A beautiful light lavender opening 5 or 6 well placed florets on a medium height stem. Color seldom flecks. Very slow propagator and bulblets are hard to germinate. Otherwise—very good.
 L 3-20c, M 5-20c, B 100-20c
- MISS VERMONT** (Hatch 45) 80 Days 540
 A light pink with a lavender oar to it shading deeper in the throat. Opens 6 on a medium tall spike. A very good keeper and thus a good commercial.
 L 2-20c, M 3-25c, S 5-25c, B 10-20c, 100-\$1.60
- MISS WISCONSIN** (Greuger 43) 90 Days 460
 An eye-ful in a light rose pink, that will open 8 large florets on a good stem. You might not like it on close examination, but for something to attract attention, try it.
 L 2-30c, M 2-25c, S 3-25c, B 10-20c, 100-\$1.60
- MORNING STAR** (Van Prooyen 48) 85 Days 500
 A wide open flared floret, enhanced by a heavy midrib on the three outside petals. White, tall spikes, 6 open out 15-18 buds, and good growth gives us another attractive white. Has some reversion tendencies as do all Picardy sports. Propagation fair.
 L \$1.00, M 75c, S 50c, B 10-\$1.00, 100-\$8.00
- MOUNTAIN GEM** (Requa 46) 80 Days 436
 Very good this year in spite of a hot summer. Scarlet red with the edges of the petals sometimes having a light edging. Opens 6-7 large round florets on a tall straight spike. A good cutter with good attachment. Blooms readily from all size bulbs.
 L 75c, M 50c, S 35c, B 3-25c, 10-75c, 100-\$6.00

- MRS. E. BOTH (Both 43)** 85 Days 530
 Light orange pink with a harmonizing deep clear cream throat. Beautiful color combination. If it would grow a little bit taller it would be one of the best. Opens 6 to 8 on a husky but short spike.
 L 35c, M 2-30c, S 4-25c, B 100-35c
- MRS. R. G. ERREY (Errey 48)** 85 Days 554
 A very good black red from Australia. Similar in color to Black Opal, but bigger and smoother. 7 or 8 very dark red large round florets open on a good stem. They are well placed and well attached.
 L 75c, M 50c, S 25c, B 3-25c, 10-75c
- MRS. MARKS MEMORY (K&M 41)** 85 Days 570
 A huge exhibition purple which will hold very large florets. A small dark carmine throat mark gives a nice touch of color. Inclined to peel, so pick early and open inside.
 L 3-20c, M 5-20c, B 50-25c
- MYRNA (Pruitt 39)** 80 Days 400
 Either very good or not good. Heavily ruffled ivory white that when it makes a good spike, you have a prize winner. Buds show up as ivory color before opening, but whiten up after opening. Performance is spotty.
 L 3-20c, M 4-25c, S 10-25c, B 100-25c
- MYRNA FAY (Lines 46)** 75 Days 466
 An early orchid lavender. Color not too good for show purposes but makes a good commercial. Opens well when cut in tight bud. Will open about 8 on a 20 bud spike. Propogates well and bulblets often bloom.
 L 50c, M 35c, S 20c, B 10-25c, 100-\$2.00
- NADIA (Leffingwell 37)** 90 Days 231
 One of the nicest small ones we have, and a strong contender for section champion. Upper petals are bright salmon and lower petals a deeper yellow. Have had 8 or more open. Spikes are wiry and usually straight.
 L 25c, M 20c, S 2-25c, B 10-25c, 100-\$2.00
- NEW EUROPE (European 47)** 100 Days 436
 A brilliant scarlet red, tall strong grower with 8 huge florets open on a good stem. Color and performance excellent. Cut early as it will sunburn. A little late in blooming is its chief fault.
 L 2-20c, B 100-25c
- NEW ZEALAND SPLENDOR (Toon 39)** 95 Days 541
 A deep bright pink with a rose throat feather. Holds 5 to 6 open on a good spike. Moves well on the late wholesale market.
 L 3-25c, M 4-25c, S 10-25c, B 100-25c
- OCTOBER SUNSHINE (Quachenbush 47)** 85 Days 420
 A very nice light orange that shades to yellow in the throat. Beautiful and an excellent commercial because of its ability to open well when cut tight. Spikes are straight, tall and husky. Bottom floret will misplace at times.
 L 50c, B 10-40c

- OGARITA (Willson 42)** 90 Days 532
One of the strongest growers in the field. Spike after spike 5 to 6 feet tall, straight and sturdy. Opens 6 to 8 on an 18 to 20 bud flowerhead. Plain petaled rose salmon shading to a golden throat. Petals are slightly fluted and have a very crisp appearance. Could make the longest flowerhead in lots of shows.
L 3-25c, M 5-30c, B 100-25c
- OHIO NON PAREIL (Wilson 41)** 85 Days 350
Clear bright red that is obviously classified wrong as it should be 450 at least and probably belongs in 550 where it was classified in 1948. 6 to 8 large florets on a long straight spike. Good exhibition and good commercial.
L 2-20c, M 4-20c, S 10-25c, B 100-25c
- OKLAHOMA (Wilson 45)** 90 Days 386
A very good smoky for you "smoky fans." Pink, lilac, nicely blended on beautifully ruffled large wide open florets. Tall straight spike. 7 to 8 open on a 19 bud spike. Attachment, texture and placement very good. Recommended.
L 25c, M 2-30c, S 4-25c, B 15-25c
- ORANGE GOLD (Marshall 45)** 80 Days 422
A tall growing orange shading gradually to a yellow throat opening about 5 or 6 florets. Strong husky plant, with wide dark green foliage. Healthy. Good propagator. A good orange and worthy of consideration. Flowerhead could have a little more stretch.
L 3-30c, M 3-20c, S 6-25c, B 100-50c
- ORANGE PRINCE (Snyder 45)** 80 Days 324
Brilliant orange with flame throat marking. 6-8 florets open on a strong stem. Sport of Vagabond Prince. Fits nicely into an open place in the 300 class.
L 20c, M 2-30c, S 3-30c, B 10-25c
- OREGON GOLD (Majeski 41)** 110 Days 410
A really nice light yellow with a nice crisp appearance. Nicely ruffled. Will hold 6 to 8 open on a tall straight spike. Plant early, for the shows as it is a late bloomer. Good florist flower as it opens well in water.
L 3-25c, M 5-25c, S 10-25c, B 100-25c
- OREGON ROSE (Mitsch 38)** 77 Days 460
A shade of old rose that is very appealing. Blends lighter towards the edge of the petal. Show record is good.
L 3-20c, M 5-20c, B 100-20c
- ORIENTAL PEARL (Carlson 46)** 85 Days 506
Lack of stretch is our chief objection to this giant clear cream. Grows tall but the florets are too closely bunched to do it justice. Opens 4 to 6 florets which at times will reach 7" in diameter. Heavy propagator.
L 20c, M 2-25c, S 4-25c, B 25-25c
- ORPHEUS (Roberts 48)** 80 Days 423
A bright salmon orange, an attention getter, with a clear cut deeper blotch on a cream center. Opens 6 to 8 ruffled florets on a tall spike. A novelty but very attractive.
L 75c, B 4-25c, 10-50c

- PARTHIENA (Hitchcock 49)** 90 Days 566
A coming deep lavender commercial. Slightly frilled and ruffled, with a trace of needlepointing giving a firm appearance to the 6 to 8 florets that open on a medium length flowerhead. Very little crooking. For show purposes color could be better, but for commercial, you will see lots of it.
L \$1.50, B 1-15c, 10-\$1.50
- PASTEL (Both 42)** 90 Days 486
Petals of rose gray edged with a steel blue rim, and a texture like velvet give a pleasing combination. Add 6 open on a 16-18 bud straight spike and you have a "smokie" that will please everyone, especially the "smokie" fan. Very nice.
L 20c, M 2-35c, S 3-25c, B 25-50c
- PAUL ROBESON (Cave 43)** 454
A beautiful dark red that opens 8 florets on a tall well proportioned spike. Burns in the sun so cut early and open inside. A very good color and a good one in every way. Hold 8 open on a tall spike.
L 40c, M 30c, S 20c, B 10-25c, 100-\$2.00
- PEGGY (West 46)** 80 Days 366
The more we see of Peggy, the better we like it. Not a big one, but a true clean self lavender with no flecking. Hold 5 to 6 open on nice stem, typical of what you should expect for a 300 glad.
L 75c, S 25c, B 4-25c, 10-50c
- PELEGRINA (Pfizer 33)** 80 Days 378
This is a dark blue that is being rapidly replaced by Abu Hassan. A very dark blue, but growing habits are bad. Inclined to fall over in the field and crooks very badly. Plant extra deep and give lots of water. Opens 4 to 5.
L 3-20c, M 5-20c, B 100-20c
- PENELOPE (Deam 48)** 75 Days 466
Mauve or lavender that grows 6 open on a tall slender stem. Well proportioned stem and head. Color shades to a white throat that is somewhat peppered with mauve spots. Opens well in water.
L \$1.50, M \$1.00, S 60c, B 10-\$1.00
- PERFUME (Brauer 41)** 75 Days 301
We had some excellent spikes of Perfume this year and it isn't too bad when it performs the way it did this year. We grow it principally for its fragrance which is very noticeable and transmits to a fair extend to its offspring. Color is creamy white with a small purple feather, not very pretty. Opens 4 or 5 large florets on a medium tall stem.
L 2-20c, B 25-15c
- PERSONALITY (Butt 47)** 85 Days 542
Rosy salmon or a light rose pink with no flecking. Resembles Picardy in spike formation and general growing habits. Propogates well.
L 40c, S 2-35c, B 10-25c
- PHANTOM BEAUTY (Bastian 47)** 85 Days 440
A clean shell pink, very light almost too light to suit us shading darker in the throat. Opens up to 10 florets on a nice spike. 6 in color and about 6 more buds. Bulblet production and germination very good.
L 50c, M 35c, S 25c, B 5-25c, 10-50c

- PICARDY (Palmer 31)** 90 Days 530
 One of the real glads and probably the best known and most widely distributed in the world. Clear soft salmon with a flesh colored throat, overlaid with a soft rose feather. It is really something to go out early in the morning and pick a dew fresh spike of Picardy, with 6 to 8 large florets open on a strong straight stem. Grows well, propagates well.
 L 3-20c, M 5-20c, S 10-25c, B 100-25c
- PINK RADIANCE (Quackenbush 41)** 85 Days 440
 A light silvery pink without markings. Holds 6 to 8 open on a 16-18 bud medium tall spike. Attachment good, placement good, heavy texture. Worth looking at.
 L 3-25c, M 6-25c, B 40-25c
- POET'S DREAM (Fischer 46)** 85 Days 366
 We have always liked this clear light lavender, with its creamy white throat. For a 300 glad its florets are large. They are nicely set on a tall straight stem. Good commercial prospect.
 L 3-20c, S 10-20c, B 100-25c
- PROSPERITY (Silvia 47)** 85 Days 560
 A very attractive ruffled sport of Picardy, light rose salmon color, different and very attractive. Grows tall, strong and straight. Good propagator and some of the bulblets will bloom. For show purposes you will probably have to stake the spikes.
 L 35c, M 25c, S 2-25c, B 100-35c
- PURPLE SUPREME (Wilson 42)** 85 Days 470
 A medium purple with a silver edge on the petals, holding up to 10 open on a tall spike. It peels badly at times and any bird or insect damage is very noticeable. Otherwise very good for cut flower and show work.
 L 3-20c, B 100-25c
- RAVEL (K-M 47)** 77 Days 477
 Violet blue with dull red throat blotch. Much cleaner in color than Blue Beauty. 6-8 open on a tall strong stem. A prize winner at shows. An interesting addition to the blue class.
 L 25c, M 20c, B 15-25c
- RECADO (Palmer 37)** 90 Days 480
 A smoky or rosy ash flecked and splashed with orange scarlet with a darker blotch. Opens 6 to 8 well placed blooms on a spike that is usually tall and well proportioned.
 L 3-20c, M 5-20c, S 10-20c, B 100-25c
- RED CHARM (Butt 39)** 85 Days 452
 A medium shade of red shading a little darker in throat. Opens 8 or more large florets on a very good spike. One of the finest all around reds, exhibition and commercial. Good propagator. Bulbs are inclined to sprout in storage very easily.
 L 3-20c, M 5-20c, S 10-25c, B 100-25c
- RED CHERRY (Roberts 46)** 70 Days 450
 A very nice early red, lighter than Red Charm and considerably earlier. Medium light cherry red with a throat that is slightly darker, a very interesting combination. Opens 6 to 7 wide rounded florets on a tall straight stem, very well proportioned. Good propagator. Recommended.
 L 75c, M 50c, S 30c, B 3-20c 10-60c, 100-\$4.50

- RED PLUSH (Baerman 43)** 70 Days 536
 A scarlet that is crisp with broad florets like a piece of rich red plush. Florets are nicely ruffled, but attachment is not as good as it could be. Opens about 6 on a nice stem.
 L 2-25c, M 4-25c
- RED RASCAL (Graff 45)** 83 Days 550
 A commercial prospect in a ruffled red, just a shade or two darker than Intruder. A small white rib runs to the lip of the lowest floret. Opens 6 to 8 on a tall stem. Opens well when cut tight, and handles nicely.
 L \$1.00, M 60c, S 40c, B 3-25c 10-\$1.00
- RED WING (Wright 48)** 85 Days 536
 Excellent this year for us, and also for many others as there were quite a few very nice spikes at the shows. A scarlet red, rich and vibrant with color, excellent growth, tall and straight, every one of them. There is a deep scarlet blush on the lower petals. Florets are just within the 500 limit, and are slightly recarved—somewhat ruffled. Opens about 8, with 6 buds in color and 20 to 24 total. A good show flower and a coming commercial.
 L \$2.50, M \$1.75, S \$1.00, B 1-25c, 10-\$2.00, 100-\$16.00
- RELIANT (Krueger 48)** 115 Days 500
 Its main talking point is its huskiness. White, with a rather poor throat blotch of cream and tan. 6" florets, 6 to 8 open but the top of the spike does not stretch enough to make a balanced spike when the first florets open. Will open to the top however. Giant in size as far as the general plant is concerned, both the circumference of the spike and the plant itself are big. Might be a good one to use for hybridizing where one is working for a husky plant. Good propagator. Late.
 L 75c, M 50c, S 25c, B 3-25c, 10-75c, 100-\$6.00
- RIO RITA (Lins 41)** 95 Days 523
 A pretty light orange with a scarlet blotch in the center, a very good contrast. Opens 6 to 8 florets, somewhat ruffled on a good stem. Good commercial and a good show flower. Burns in bright sun.
 L 2-20c, M 3-25c, S 6-25c, B 100-35c
- ROCKET (Palmer 41)** 85 Days 450
 A nice scarlet red that moves well on the commercial market. Opens 6 to 8 florets on a spike that is medium tall. Needs a little extra water for best results.
 L 3-20c, B 100-25c
- ROMANY (Youmans 45)** 80 Days 481
 Like most smokies, Romany is a good performer. A strawberry with a blue and red blotch, that produces a strikingly beautiful result. 6 open on a good spike.
 L 3-30c, M 4-25c, S 6-20c, B 100-25c
- ROSA VAN LIMA (Pfitzer 40)** 80 Days 460
 One of the early pinks that is good for both show and commercial. Light rose, with some darker lines in the throat. Will open 6 to 8 florets on a tall straight stem. Always dependable.
 L 3-20c, M 5-20c, S 10-20c, B 100-20c

- ROSEA (Errey 40)** 85 Days 560
A very pleasing shade of clear rose. The 6 to 8 large (up to 7") florets on a strong snail-like spike are well placed. Seems to be well liked by everyone.
L 3-25c, M 4-25c B 100-25c
- ROSE O'DAY (Fischer 44)** 70 Days 560
A lavender on the rose side of the spectrum. 8 to 10 large florets open at one time, with plenty of color in the remaining buds. Blooms well from small buds and even from bulblets. Good exhibition and probably a good commercial.
L 15c, M 2-20c, B 50-25c
- ROYAL GARNET (Haring 44)** 80 Days 454
A very nice dark red—not too dark—with large florets nicely arranged on a nice medium tall spike. There is a touch of fire red in the throat which adds very much to its attractiveness. Medium early.
L 2-30c, M 4-25c, S 6-25c, B 100-25c
- SALMON'S GLORY (Salmon 47)** 80 Days 507
A light cream whitening to the petals edge, with a carmine mark on a strong yellow base. Florets are smooth petaled, opening wide and round, opening 6 with 6 in color. Spike is strong, straight and wiry. One of the best Holland varieties but for beauty, we will still take Margaret Beaton.
L 2-25c, M 4-25c, S 10-25c, B 100-25c
- SEASHELL (Roberts 49)** 85 Days 540
A large tall pink that seems very interesting. Shell pink flowers, lightly ruffled, with very heavy substance, texture is like satin. Well worth trying as it has the appearance of a good one.
L \$1.00, M 75c, S 50c, B 2-20c, 10-75c
- SENSATION (Marshall 39)** 105 Days 560
A deep pink that produces large spikes and large florets. It is very late, which hurts it for shows, but if you have a long growing season, it is worth looking at. A light cream center adds to its beauty. Opens 6-8 on a tall spike.
L 3-20c, S 10-25c, B 100-25c
- SHERWOOD (Pruitt 48)** 80 Days 470
One of the real good purples, a much improved King Lear, larger, better attachment and nicer floret formation. Opens 6 large ruffled florets on a tall strong stem.
L \$1.00, M 60c, S 40c, B 5-25c, 10-40c
- SIBONEY (Allen 48)** 90 Days 566
A clear lavender of a medium shade that blends a little deeper in the throat. The large, 6 to 7" florets are beautifully ruffled. Attachment excellent, placement very good, spike tall and strong. Color very good—what more can you ask? Has a splendid show record.
L \$1.00, M 75c, S 50c, B 4-50c, 10-\$1.00
- SIGNET (Riley 44)** 85 Days 400
Hasn't had to much publicity but for us it performs very well. A beautifully ruffled clear white with 6 open on a good stem, good texture. Makes plenty of bulblets which germinate well. A very good commercial.
L 3-20c, M 5-25c, B 100-25c

- SILENTIUM** (Pfister 41) 80 Days 401
A beautiful white with a red feather in the throat. Attractive, propagates well. Good show flower and excellent commercial. About 6 open on a good spike. Good show flower and good commercial.
L 3-20c, M 4-20c, S 10-20c, B 100-25c
- SILVER WINGS** (Ritsema 44) 85 Days 500
A pure white sport of Picardy that is ruffled, produces large florets and will hold 6 open on a large beautiful spike. Well liked for both show and commercial. Will sometimes show a Picardy reversion tendency. One of the best of the Picardy sports and you will like it very much. Recommended—If you do not have Silver Wings, be sure to try it.
L 3-30c, M 4-25c, S 6-25c, B 100-25c
- SINCERITY** (Errey 42) 85 Days 407
Cream with the lower petals a deeper shade of cream, on which are contrasting scarlet spots. Will hold 8 or 10 open at one time on a good spike. Good commercial prospects.
L 75c, M 50c, S 35c, B 10-50c
- SNOWBANK** (Palmer 45) 85 Days 400
Beautifully ruffled white with a creamy throat, holding 6 to 7 open on a good spike. Good for show purposes, excellent for commercial.
L 3-30, M 4-25c, S 10-25c, B 100-25c
- SNOW CRUISER** (Evans 43) 90 Days 500
An immense super giant white, very clear, no markings. Attachment is poor on about 95% of the spikes. Productive. Hold about 6 open on a good spike.
L 20c, M 2-30c, B 25-25c
- SNOW FLAKE** (Pfister 48) 100 Days 500
A really beautiful ruffled pure white. Will hold 6 to 8 open on a long straight flower head. Propagates well. Excellent show and commercial. Very good and recommended.
L 50c, M 35c, S 25c, B 10-50c, 100-\$2.50
- SNOW FLURRY** (Clark 48) 90 Days 400
A clear, clean pure white with just a touch of cream in the throat. Buds have an ivory tint until open. Good attachment, wide open florets. Sport of Picardy and will show the Picardy stripe at times. Good propagator.
L 50c, M 30c, S 20c, B 100-75c
- SNOW MAID** (Cave 48) 85 Days 400
A medium size snow white of excellent all around good qualities. 6 to 8 open, tall straight spike, excellent placement, healthy foliage. Opens to the tip. Good prospect for show and commercial.
L 50c, B 6-25c
- SNOW PRINCESS** (Pfizer 39) 80 Days 400
A nice clear pure white, with large round wide open florets. Good shipper and one of the leading commercial whites. Opens well when cut in tight bud.
L 3-20c, M 5-20c, B 100-25c

SNOWSHEEN (Snyder 42)

75 Days

300

The glistening sheen of this snow white gladdens a well grown spike is something to write about. Tall spikes, medium large florets, well proportioned and its clean appearance all combine to make this good for show and commercial.

L 2-30c, M 3-30c, S 6-30c, B 100-50c

SPARKS (Glass 47)

95 Days

507

Cream on the yellow side, with an orange scarlet feather on the lower petals. Opens 6 or 7 large fluted triangular florets, well placed and attached on a good spike of 15 to 18 buds. Spike is medium full to tall. Very interesting and an attention getter.

L 35c, M 25c, S 2-25c, B 15-25c, 100-\$1.25

SPIC AND SPAN (Carlson 46)

80 Days

432

A tall ruffled deep pink that will open 8 to 10 on a long straight spike. Nice placement and good attachment. Good show spike and good commercial, making saleable spikes from small bulbs. Good propagator. Well worth your investment.

L 75c, M 50c, S 30c, B 10-35c, 100-\$2.70

SPITFIRE (Evans 42)

80 Days

432

Rosy toned salmon on the scarlet side with a white throat. Will hold 9 open on a tall strong spike. A good cut flower as it is long lasting. Winner at many shows and good commercial. Propagates well.

L 25c, M 2-25c, S 6-25c, B 100-25c

SPOTLIGHT (Palmer 44)

80 Days

413

You can hardly go wrong on Spotlight. A clear medium yellow with a small bright scarlet blotch, waved florets, 6 to 7 open on tall straight spikes. Good propagator and excellent all around. Recommended without reserve.

L 3-25c, M 4-20c, S 6-25c, B 30-25c, 100-60c

STARLET (Baerman 44)

70 Days

200

An excellent small early white. Florets are waxy white, filled with 3 to 5 open on a 12 to 15 bud spike. A little too far apart on the wiry tall stem, but that does not seem to hurt it in any way for either show or commercial use. Good keeper. Bulblets usually germinate well.

L 3-30c, M 4-25c, S 10-25c, B 100-35c

ST. EDWARD (Both 40)

95 Days

436

An orange scarlet with some creamy white in the throat. Tall wiry stems with 6 to 8 open, in double row formation. Attractive and very saleable.

L 15c, M 2-20c, B 10-20c

STELLA ANTISDALE (Evans 40)

80 Days

540

Light pink shading lighter in the throat—inclined to fleck badly. Otherwise dependable and a good grower. For commercial use the flecking doesn't hurt, and it moves readily on the wholesale market. 6 open on a tall husky spike.

L 3-20c, M 5-20c, B 100-25c

- STRATHNAVER** (Peattie 47) 85 Days 500
Like all the giants, only an occasional spike will have good attachment. Very large florets, up to 7", with 6 to 8 open on a tall stem. Pure white and if you are working toward a white cross, this has possibilities. Propogates medium well.
L 50c, M 35c, S 20c, B 10-50c, 100-\$4.00
- STYLE PLUS** (Wilson 44) 85 Days 330
A beautiful combination of pastel shades--light salmon blending to a creamy center, in one of the best ruffled florets. Heavily and evenly frilled on the edges. Not seen too often; but if you are out for the most ruffled, be sure to look at this. 5 to 6 open on a good spike.
L 25c, M 2-35c, S 4-25c, B 100-25c
- SUMMER GAL** (Zimmer 44) 80 Days 542
Geranium pink with large ruffled blooms. There is a rose feather in the throat. Holds 6 to 8 open on an excellent spike. Certainly well worth looking at. A good one and well liked all over.
L 75c, M 50c, S 25c, B 5-25c, 100-\$4.00
- SUNKIST** (Errey 48) 423
A glowing apricot pink with rich cream lower peals, powdered with apricot in the throat. Outstanding for show and has a good show record in Australia.
L 50c, M 35c, B 5-25c
- SUNLIGHT** (Spiller 46) 85 Days 416
Light golden buff with 6 to 7 open on a 16 to 18 bud medium tall spike. Large nicely ruffled florets. One of the best in its class.
L 35c, M 25c, S 2-30c, B 10-25c, 100-\$2.00
- SUNSPOT** (Roberts 45) 80 Days 417
A light apricot buff with a rose spot in the throat. Produces, almost without fail, a tall straight spike, with 8 to 10 open. Color is good and so is general appearance. Wins lots of ribbons at the shows.
L 75c, M 50c, S 30c, B 3-20c, 10-60c, 100-\$4.50
- SUPREME BEAUTY** (Bastian 47) 80 Days 432
A dark salmon pink with a creamy yellow throat. Holds up to 8 open. 6 in color out of 20 buds. Florets are ruffled and wide open. Good propogator.
L 50c, M 35c, S 25c, B 5-25c, 10-40c
- SUSQUEHANNA** (Herridge 43) 90 Days 416
A clear peach colored buff with a creamy throat, a very good color. Lacks stretch unless babied. Short to medium spike, straight and well proportioned with 4 to 6 open.
L 2-25c, M 4-25c, B 100-25c
- TARAWA** (Palmer 46) 85 Days 436
A small scarlet with a cream line in the throat. Florets are triangular, ruffled with about 8 open on a 20 bud straight spike. Bulblet production fair and germination good.
L 20c, M 2-25c, S 4-25c, B 10-35c

- THEMESONG (Klein 47)** 88 Days 570
A very unusual color combination, mild light purple with a cyclamen blotch. Very distinctive and unusual. Will open 6 to 8 florets on a 16-18 bud spike, with color in most of the remaining buds. Placement, attachment and general overall picture is good.
L 30c, M 20c, S 2-25c, B 10-50c
- TITAN (Palmer 39)** 85 Days 532
A deep pink salmon, with 6 to 8 large florets open just on the border line between a 432 and 532 classification. Nicely ruffled, excellent placement and a well balanced spike. Rates good for show and commercial, very reliable. Have had some good seedlings on crosses on and with Titan.
L 2-25c, M 4-25c, S 10-25c, B 100-25c
- TIVOLI (K & M 47)** 90 Days 461
Watch this one—it has the earmarks of a good one. A beautiful soft rose shading to a very light throat. Florets are large and wide open, with 6 to 8 open on tall upright stems. Florets are well faced and nicely spaced. A comer for both show and commercial.
L 25c, M 20c, S 2-25c, B 10-25c, 100-\$1.00
- TRALEE (Kreuger 47)** 75 Days 460
A distinctive silvery rose, opening 6 to 8 florets on a good stem. Performs well, propogates well, and it is early. Should make the commercial market easily.
L \$1.00, S 50c, B 10-\$1.00
- TUNIAS ELITE (Both 47)** 80 Days 590
A bronzy orange "smokie", edged with a smoky orange. A bright red throat blotch adds a very interesting touch of color. Will hold 6 to 8 open on a good spike. Florets are slightly ruffled. You should like this one.
L 75c, B 5-25c
- TUT'S BOTH (Both 43)** 80 Days 422
A deep pastel orange with a small blue tongue. Opens 6 on a tall, strong, straight spike. Very good all around orange for both show and commercial. Cut when first bud shows color as it burns in the sun. Opens well when cut tight. Outstanding in basket work.
L 3-20c, M 4-25c, B 10-25c
- VAGABOND PRINCE (Palmer 34)** 80 Days 391
A potential section champion in most any show. Mahogany brown with a flame colored blotch. Holds 6 to 8 open on a medium tall spike. Everyone seems to like it—good as a commercial also.
L 3-20c, M 5-20c, B 100-20c
- VENIDA (Milo 47)** 90 Days 460
Rose with a large creamy white center. Very attractive, especially when shown in a basket or vase. Hold 8 open on nice spikes. Well worth consideration for both commercial and show purposes.
L \$1.00, M 60c, S 40c, B 4-25c, 10-50c
- VICTORY QUEEN (Wilson 45)** 95 Days 430
A ruffled deep salmon pink with a cream throat, very attractively ruffled. Opens 6 on a very nice spike. Propogates well. Very likeable.
L 25c, M 2-30c, S 2-25c, B 10-25c

- VIOLET DICKINSON (Barrett 46)** 501
 A nice white with lavender stripe on the lower petals. Striping is not very prominent. Opens about 6 on an 18-20 bud spike which is tall and straight.
 L \$1.50, M \$1.00, S 60c, B 4-25c, 10-50c
- WANDA (Snyder 41)** 85 Days 406
 A cream sport of Picardy that grows in about the same general style—6 open, good spike. Moves well on the wholesale market.
 L 3-20c, M 5-20c, B 100-25c
- WAR PAINT (Kadel 47)** 90 Days 436
 A dark scarlet, blending darker in the throat that will open about 8 florets on a 20-22 bud spike. Good flowerhead, straight and tall. Does not sunburn. Good show and commercial.
 L \$1.00, M 75c, S 50c, B 10-50c, 100-\$4.00
- WAX MODEL (Kreuger 46)** 75 Days 400
 A small lavender throat spear on a glistening white floret. Good size blooms, on a 17 bud spike. Tall grower and always straight.
 L 35c, M 25c, S 2-30c, B 10-35c, 100-\$2.80
- WEDGEWOOD (Fischer 47)** 80 Days 366
 One of the very nicest of the small lavenders and should be in every garden. About 5 waxy ruffled florets open on a slender well proportioned spike. A creamy throat blends very well with the blue lavender. Very healthy, propagates well and a show winner as well as a good commercial.
 L 35c, M 25c, S 2-30c, B 15-25c, 100-\$1.50
- WHITE CHALLENGE (Arnett 47)** 90 Days 501
 7 to 9 larger round wide open well placed florets, plus a strong tall spike, give us another good one. There is a faint, but noticeable, pink blush, which does not detract in any way from its whiteness. Seems to be well liked by all. Should make a good commercial.
 L 50c, M 35c, S 25c, B 3-25c, 10-\$1.00
- WHITE CHRISTMAS (Fischer 48)** 85 Days 500
 A real beauty, heavily ruffled, waxy textured white that is good almost every way. 6 to 8 florets open, well attached, tall, strong spike with 18-20 buds. Buds have a creamy cast before they open, same as does Myrna—one of its parents. Also inclined at times to have a very slight pinkish cast. Good from all angles. Blooms well from bulblets, and opens well when cut tight.
 L 50c, M 35c, S 20c, B 10-25c, 100-\$2.00
- WHITE GODDESS (Robert's 48)** 80 Days 500
 A large clear white, shading to a light cream center, with 6 to 8 large heavily ruffled florets on a 20-22 bud, strong, straight stem. One of the strongest growers. Blooms from bulblets. Germinates and propagates well.
 L \$1.00, M 75c, S 50c, B 3-25c, 10-75c, 100-\$6.00

WHITE GOLD (Scheer 41) 70 Days 506

In a class with considerable competition so it seldom wins on the show table, even though it will open 5 or 6 large clear light cream florets on a tall stem. Could have a little longer flower head. Excellent commercial, as it is an early bloomer and makes the tall shapely spikes the florists want.

L 3-20c, M 5-20c, S 10-20c, B 100-25c

WHITE MAGIC (Kuhn 47) 80 Days 500

Another of the heavily ruffled clear whites. Holds 6 open with 6 to 8 buds in color. Spike is tall and straight. This is a fine crisp white and worthy of consideration. There is a slight violet tinge in the throat.

L \$2.00, M. \$1.50, S \$1.00, B 2-30c, 10-\$1.25

W. H. HOSMER (Hatch 49) 466

Hold 8 to 10 open florets of a lavender pink or rosy lavender shade, out of about 20 buds. Lip is cream white, somewhat peppered in the throat. Florets are ruffled, with substance and textures good. Stems are tall, slender and straight.

L \$4.00, C \$3.00, B 1-50c, 10-\$4.00

WINSTON (Palmer 41) 80 Days 406

Still one of our favorites because of its clear bright cream white, gradually shading to lemon in the throat. Will open 4 to 6 beautifully waved and ruffled florets on a medium tall spike, but they have the appearance of being carved from marble. Florists like it very much.

L 3-20c, M 6-25c, B 100-25c

WORLD BEATER (Pfister 49) 85 Days 411

In spite of the ballyhoo received by this glad, we were very much disappointed in it. Color is, in our opinion, inclined to be a muddy yellow and the red throat mark not too pleasing. Grows well, opening 6 to 8 florets on a tall 20-22 bud spike, well proportioned. We will stick with Spotlight for color, even though it doesn't open as many as World Beater.

L 3-30c, M 4-25c, B 50-25c

W. R. READER (Turnbull 42) 70 Days 530

A light cream center surrounded by a deep salmon, almost a scarlet, makes a very attractive picture. 6 to 8 open on a tall straight stem. Good florist flower.

L 3-25c, B 100-25c

YANKEE LASS (Schenetsky 46) 85 Days 440

A light shell pink without markings, holding 8 to 10 open on a tall well proportioned spike. A sister seedling to Connecticut Yankee. We like it better because of its color. Should make a good commercial and a good exhibition flower.

L \$1.50, M \$1.00, S 50c, B 1-15c, 10-\$1.50

YELLOW HERALD (K&M 47) 80 Days 411

A rich amber yellow with carmine in the throat. Blooms fairly early and you will get a good percentage of show spikes from a planting. Large, slightly ruffled florets on a strong straight tall stem. Worthy of trial.

L 2-30c, M 4-25c, B 100-25c

ODDS AND ENDS

We do not have enough stock of the varieties listed below to warrant a detailed description of them. At the same time, we realize some of our customers might be interested in them. These are offered on a first come, first served basis, as long as our stock lasts. Our stock is limited to a few bulbs and bulblets on many of them. Some were purchased with the idea of seeing them grow or using them for hybridizing, others might be left overs from previous large stocks, some we are continuing to grow and will sell only a part of our stock.
